

Names: Quinton Walberg, Elisabeth Guzman, Caleb Anders, Zach Harbert

Activity #2

1. What about the speaker's instructions worked well?

Zach was our speaker and he used a lot of geometry terms that we all knew so we were all on the same page.

2. What about the speaker's instructions was difficult to follow?

He also mentioned margins a lot when he was describing, however he didn't specify where the margins were taken from, the center of the shape or the side of the shape. He also told us to draw a hexagon, but he didn't tell us which way the hexagon was facing.

3. If you had to repeat the activity, what would you do differently?

I would have communicated more directly in describing the size of the dot inscribed in the hexagon, as well as clarifying the orientation of said hexagon, as well as being more descriptive in how the margins specified were measured.

Example Abstract Art:
